

Portable Air Conditioners

Rinnai

Relax. It's a Rinnai.

Climate control that really moves with the times.

For over 40 years, Rinnai have been providing Australian homes with premium, quality products that offer solutions to comfortable living. Following the stunning success of our Inverter Split Systems, comes a brand new range of Portable Air Conditioners, set to redefine the way you think about movable climate control in your home.

The usual Rinnai hallmarks of quality and efficiency have been combined with sophisticated, elegant design to create a range of Portable Air Conditioners that offer reliability, convenience and most of all, performance.

Features

- > Adjustable temperature control
- > Simple to use remote control with bracket
- > Delay timer – set the time for the appliance to switch on or off depending on your preference
- > 3 speed fan
- > Ventilation kit included
- > Fan only option
- > Swing function to allow maximum air flow throughout the room
- > Omni-directional caster wheels to easily move the appliance around
- > Convenient carry handles for ultimate portability

Additional Features

Dehumidifier mode

High levels of humidity can often lead to an uncomfortable environment. For example, if the outside temperature is only 26°C but the relative humidity is high, it will feel a lot more uncomfortable than if the humidity levels were lower. Rinnai portable air conditioners have a dehumidifying function that works to remove moisture in the air and reduce humidity levels, therefore increasing comfort.

Sleep Mode

As an ideal cooling appliance for the bedroom, Rinnai Portable Air Conditioners are equipped with an intelligent sleep mode that adjusts the temperature to maintain comfort whilst saving energy overnight. The sleep function allows the air conditioner to increase and decrease the set temperature over a 10 hour period, following a similar pattern to the outside ambient temperature.

Self-evaporative system

Traditional portable cooling appliances require complicated drip tray and hose systems to dispose of condensation, however the advanced technology used in the Rinnai Portable Air Conditioners operates on a self-evaporative system. Instead of needing to empty a water-bucket constantly, the system evaporates condensate through the exhaust duct, hassle free!

Ventilation Kit included

All Rinnai portable air conditioners are supplied with a ventilation kit that allows the unit to vent hot air outside. Each kit includes the necessary components for either window or wall installation.

Specifications

<i>Model</i>		<i>RPC35WA</i>	<i>RPC41WA</i>
BTU		12000	14000
Rated Power	W	1600	2000
Power Supply	V / HZ	220-240 ~ / 50	
Dimensions	Height (mm)	795	
	Width (mm)	480	
	Depth (mm)	400	
Weight	Kg	33	
Air Flow Volume	m ³ /h	410	450
Rated Cooling	kW	3.55	4.10
Rated Cooling Current	A	5.95	7.89
